

Elevate the resident experience with fast, secure wifi that just works.

eero for Communities is a purpose-built network management tool for managed properties that will make it easy to deploy and manage eero mesh wifi for your residents.

Service Left in Place (SLIP)

Automate resident onboarding and easily enable residents to access and control their own personal networks.

Advanced online security

Keep residents devices safe with advanced threat protection and eero Secure.

Property manager portal

Quickly assist residents with simple connectivity issues and validate resident claims.

Property-wide service

Facilitates smart building experiences through a property-wide SSID for IoT devices.

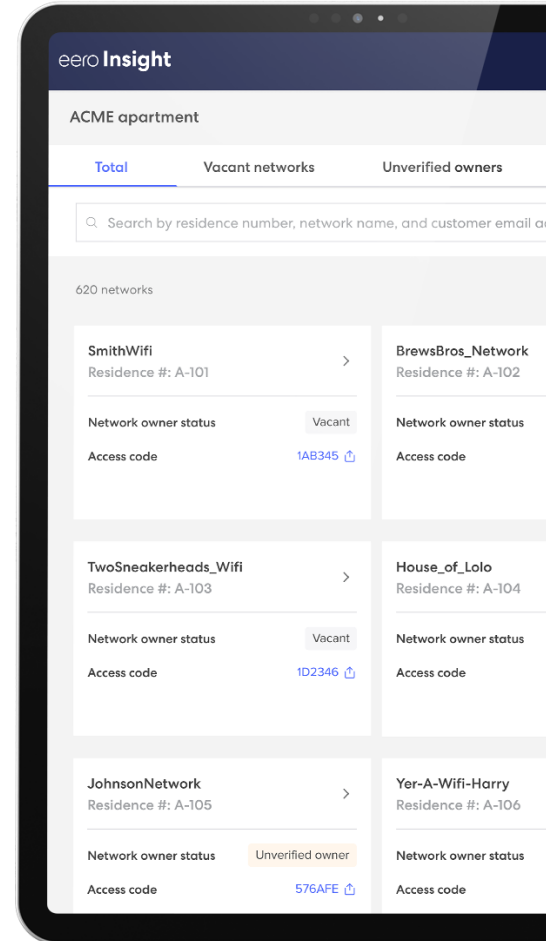

Easy resident onboarding

Manage resident transitions with easy resident onboarding and management.

MDU RF optimizations

Automatically optimize wifi performance across all networks within the MDU.

Keep residents happy.

Fast, reliable wifi

Offer fast, reliable, and secure wifi throughout the property.

Secure online experience

Offer a secure online experience for the resident with content filtering, active threat protection and ad blocking with eero Secure.

App-based wifi management

Residents can easily manage their apartment's private wifi network using the eero mobile app.

Wifi within minutes of move-in

Use Service Left in Place to easily activate service when residents move and setup wifi for new residents in minutes.
