

MaxUC COMMUNICATOR FOR MOBILE

The following instructions were obtained while installing MaxUC Communicator on a Samsung Galaxy S9. Some steps may look slightly different or be in a different order on other devices. MaxUC may ask for additional permissions. Use your discretion for choices not mentioned in this document.

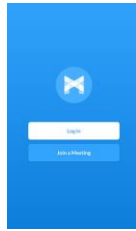

- 1) **Download** Accession Communicator from your App Store.

- 2) Click Open or find the Accession icon in your apps to launch the application.

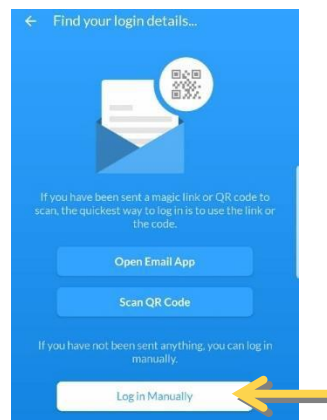

- 3) Click **Log in**.

You may get prompts asking you to allow MaxUC access to pictures and video, audio, phone calls, files, and contacts. For full functionality, please allow access.

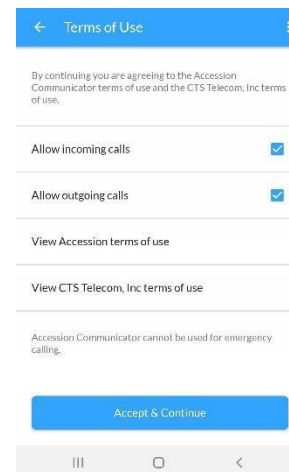

- 4) Click the **Log in Manually** button.

- 5) The screen asks you to choose your carrier. Find and click on **CTS Telecom, Inc.**

- 6) Here you can view the Terms of Use. It is recommended that you allow MaxUC to make outgoing and receive incoming calls. Click **Accept & Continue**.

- 7) Log in using your **10-digit phone number** and **CommPortal password**. If you don't know your password, call 855-769-0936 and speak with a Customer Service Specialist. As a reminder, this password needs to be at least 10-characters, and have letters, numbers, and symbols.

- 8) Enter in your 10-digit **cell phone number** in order to increase call reliability while in active calls. Then click **Continue**.
